Portfolio Website: isaaciks.vercel.app

Available for a 12-week internship from May – Aug 2026

EDUCATION

National University of Singapore (NUS)

Aug 2023 – Expected May 2027

Bachelor of Engineering in **Computer Engineering**, Minor in Quantitative Finance

GPA: 4.48/5.0

Relevant Coursework: Data Structures & Algorithms, Software Engineering & Object-Oriented Programming, Machine Learning, Probability and Statistics, Linear Algebra, Engineering Principles, Digital Design, Computer Organization, Operating Systems

Activities: Eusoff Hall Floorball Team, Eusoff Hall Handball, NUS Recreational Basketball

PROFESSIONAL EXPERIENCE

Certis Group, Singapore

July 2025 – Dec 2025

AI Engineer Intern | Python, LangGraph, LangChain, RAG, Docker, Hugging Face, Docker, vLLM, FastAPI, PostgreSQL, Git, OpenAI, Groq, LoRA Fine-tuning, Prompt Engineering, GenAI, Tool Calling

- **Engineered agentic AI workflows** for incident reporting, classification, checklist, and report generation.
- **Built a RAG AI Agent** using a Hugging Face embedding model and vector search to support context-aware responses about custom documents.
- Prepared datasets and **fine-tuned** open-weight models with **LoRA** and prompt tuning, boosting latency and **accuracy above 95%**.
- Implemented **RESTful API endpoints for model inference** using **vLLM** and **FastAPI**, enabling scalable and low-latency LLM serving.
- **Orchestrated end-to-end ML pipelines** to capture user inputs and automatically refine models, enhancing model intelligence.

Oneberry Technologies, Singapore

May 2024 – Aug 2024

Full Stack Developer Intern | JavaScript, Typescript, CSS, Next.js, Node.js, React, Zustand, MQTT, RabbitMQ, Socket.io, Bootstrap, Figma, Strapi

- **Launched a live sensor data monitoring** website, allowing **Singapore's MRT** to track **over 10,000 live sensors**.
- **Led frontend** development in a team of three, utilising **Bootstrap, Figma, CSS and Chart.js** for data visualisation.
- **Collaborated on backend** development using **Strapi for database** management, **MQTT, RabbitMQ for live testing**.
- Created **RESTful API endpoints** to support backend services, ensuring secure and efficient data access for frontend.
- **Built an e-learning web platform** featuring instructional videos, MCQ-based assessments, and automated certificate generation upon course completion.
- Incorporated **SendGrid** to automatically deliver completion certificates via email upon course completion.

PROJECTS

Bomb Go Boom | Verilog, OLED, Basys3 FPGA, Digital Design, GitHub, Embedded programming

Mar 2025 – May 2025

- **Spearheaded** development of a **bomb-defusal game** consisting of three mini-games to be completed under time constraints.
- **Programmed** game logic in **Verilog**, including state machines.
- **Embedded** software with **Basys3 FPGA**, Oled, input switches and push-buttons.
- **Tested** and debugged hardware-software interactions to ensure smooth gameplay.

NurseSched | Java, Object-oriented programming (OOP), Junit, Git, GitHub, SourceTree

Mar 2025 – May 2025

- **Collaborated** with team to develop NurseSched, a desktop application for managing nurses' schedules, patient appointments and more, via a **Command Line Interface (CLI)** in **Java**.
- **Implemented modules** for a To-do list and appointment management.
- Wrote **JUnit** tests for different modules to ensure system reliability.
- **Applied OOP principles** such as inheritance, abstraction and proper coding standards.

SKILLS & OTHERS

Programming Languages: Python, C++, C, Java, Typescript, JavaScript, SQL, Assembly

Frameworks and Tools: FastAPI, LangGraph, LangChain, RAG, GenAI, HuggingFace, vLLM, Next.js, Node.js, PostgreSQL, Git, Groq, OpenAI, Bootstrap, Strapi, Tailwind, CSS, MQTT

Cloud and DevOps: GitHub, Docker, Linux, Postman, AWS (EC2)

Certifications: IBM RAG and Agentic AI (ongoing)

Soft Skills: Collaborative team player, proactive, quick learner, adaptable, self-directed, problem solver, leadership.

Interests: Software Engineering focused on Backend and AI integrated workflows.

Hobbies: Sports, gaming, playing drums, watching shows.
